LOOKING FOR VOLUNTEERS TO TAKE PART IN A RESEARCH STUDY

Impact of CHEO Active Website

Patricia Longmuir, PhD, is leading this research study.

Are you a parent whose child has a medical condition or disability and is 6 years of age or older?

Our research study is looking for feedback from children and families about the activities on our CHEO Active website. Are the activities fun? Did you find something you could do?

With over **1,000** activity options, CHEO Active was created to promote healthy active living and provide children with resources to play! Activities on the site are matched to each child's condition - no worries about inappropriate options.

Try out our website for 1 month & send us your feedback by completing an online **20 minute** survey. As a thank you for your time, you will have continued access to the website.

Benefits to participating include contributing to the development of appropriate online resources that can assist children who need extra support to achieve a healthy, active lifestyle. There are no known risks to participating.

Participation in this study is voluntary.

This study has been approved by the CHEO Research Ethics Board

WE'D LOVE TO TELL YOU MORE!
